PROJECTS

TCP-Port-Scanner — 3 months Python

- ✓ A no-frills TCP Port Scanner using Python. This is a simple Python script that performs a port scan on a specified IP address. It prompts the user to input the IP address, the starting port number, and the stopping port number.

Python Socket Quiz — 3 months Python

- ✓ This project encompasses the basic features of a quiz program implemented using socket programming, with the quiz program being entirely written in Python. The program uses a host of python modules such as threading, time and socket.

ATMSimulator — 4 months C/C#

- ✓ A simulation of an ATM (Automated Teller Machine) system. It allows users to perform various transactions such as withdrawing cash, depositing cash, checking balance, and changing their PIN.

Linear-Regression-Plotter — 1 month Python

- ✓ Linear Regression Model and Plotter for a given sample dataset.
